## ABOUT ME

Motivated Software Engineering student with a diverse portfolio of projects developed for both final academic requirements and personal skill enhancement. Despite starting my coding journey at university, I have proactively honed my skills through hackathons, system design competitions, and continuous hands-on development. A collaborative team player, confident in communicating ideas and managing tasks, as demonstrated by extensive experience organizing cultural events in Bandung.

## EDUCATION

### SMA Plus Al-Ghifari | 2020-2023                                    **Science**

Graduated from high school with a grade point average of 83.55 and experience in the student council for two terms as head of the foreign language department and deputy chairperson. Certified in Arabic, English, and Japanese.

### Indonesia Education Univrsity | 2023-now                    **Software Engineer**

A software engineering student currently studying at the Indonesia University of Education with a GPA of 3.6 and an adaptable personality, willing to learn new things, responsible, able to work well with others, and good at time management.
